

ABC Academy

ABA therapy for **school-age children with autism ages 5-12**

About ABC Academy

Action Behavior Centers is a leading provider of applied behavior analysis (ABA) therapy for children diagnosed with autism spectrum disorder (ASD). ABA therapy uses the science of learning to help children develop new skills, build independence, and reduce behaviors that can make learning harder.

ABC Academy is a **continuation of care** for autistic children ages 5–12. It's a great fit for children who attend school part-time or full-time but still need extra support. Our program focuses on social, emotional, and executive functioning skills in a fun, exciting environment.

Using evidence-based ABA therapy, therapists work 1:1 with each child to help them reach their goals. Parents receive regular updates and progress reports and partner closely with the care team.

ABA therapy for school-age children

ABC Academy bridges the gap between early intervention ABA therapy and school. It's led by our team of licensed Board Certified Behavior Analysts® (BCBAs®) and is designed for children who:

- Have completed early intervention services but aren't ready for a full classroom setting
- Are currently in school but still need targeted support
- Benefit from structure, routine, and small-group learning

At ABC Academy, children work on skills like:

- Social flexibility and communication
- Self-regulation and emotional awareness
- Organization and time management

Hours designed for **busy families**

We know life can be hectic. At ABC Academy, we extend our operating hours beyond the traditional school day so children can attend school and still receive the after-school support they need.

Our hours of operations:

Monday to Friday: 12:00 p.m. – 6:30 p.m.

Saturday: 9:00 a.m. – 12:00 p.m.

A day in the life at ABC Academy

Every day at ABC Academy is designed to help autistic children learn, connect, and grow in fun and meaningful ways. The daily schedule includes a mix of 1:1 support, group lessons, play, and social-emotional learning. Our goal is to help children build real-world skills they can use at school, at home, and in everyday life.

Where **learning** meets **fun**

ABC Academy takes place in bright, welcoming centers designed for school-age children with autism. We create multisensory learning experiences that help children feel confident, curious, and excited to participate in daily activities.

Every center features:

- Spacious therapy areas
- Game rooms & indoor play spaces
- Cozy reading corners
- Interactive technology like virtual floors
- Art & craft areas

How to **enroll** in **ABC Academy**

Enrolling your child in ABC Academy is a step toward a bright future. Whether you're already part of the ABC family or joining us for the first time, getting started at ABC Academy is simple:

1 Confirm eligibility

Children must be ages 5–12 and have an autism diagnosis. If your child already receives ABA therapy at ABC, their current care team must clinically recommend a transition to ABC Academy.

2 Family consultation

You'll connect with our ABC Academy team to talk about your child's needs, schedule, and what to expect. We ask for a one-year commitment to help ensure consistent progress, as long as ABA therapy is considered appropriate for their needs.

3 Verify insurance coverage

For existing Action Behavior families, your child's current insurance authorization will transfer seamlessly to ABC Academy. No extra paperwork is needed. Authorizations are reviewed every six months to make sure therapy is still appropriate.

We accept most major insurances

You have enough on your plate. At Action Behavior, we work directly with your insurance company to verify benefits and out-of-pocket costs so you can focus on what matters most: **your child's progress**. Contact us to confirm if we accept your insurance.
