

Personalized Autism Care

Learn how to get started with **applied behavior analysis (ABA) therapy**

Serving children ages 18 months-13 years.

Who we are

Action Behavior Centers is a leading provider of applied behavior analysis (ABA) therapy for children diagnosed with autism spectrum disorder (ASD). ABA therapy uses the science of learning to help children develop new skills, build independence, and reduce behaviors that can make learning harder. Our evidence-based treatment is designed to unlock your child's strengths and prepare them for the future.

We understand the hopes and concerns that come with being a parent of an autistic child. Receiving an autism diagnosis can be an emotional experience. You may feel relief or stress upon realizing your lives are changing. Whatever you're feeling, our teammates are here to guide you through every step of this journey.

At ABC, we welcome you and your child with open arms. We're here for **every milestone, every challenge, and every success.**

Center-based therapy

At Action Behavior Centers, we create an exciting learning environment where children can accomplish their goals and develop communication skills in a school-like setting.

Our centers feature designated "Eats & Crafts" spaces where children engage in hands-on activities every day. Circle Time, another daily highlight, brings therapists and children together to sing, laugh, and learn as a group. Children can also explore our sensory rooms, thoughtfully designed to provide opportunities for trying new things and building fine motor skills.

Evidence-based applied behavior analysis (ABA)

ABA therapy is a gold standard in care for children diagnosed with ASD, emphasizing the development of practical skills through the use of positive reinforcement. Our expert teammates work with families to set measurable goals for their child's time with us.

ABA therapy can help children learn and develop the following behaviors:

Communication skills (*verbal language, nonverbal communication*)

School readiness skills (*imitation, matching, categorizing*)

Behavior support (*reducing unsafe behaviors like aggression, elopement, self-injury, & property destruction*)

Social skills (*initiating conversation, responding to questions from peers, engaging in interactive play*)

*Children featured are not affiliated with ABC services

Getting started with ABC is as easy as 1, 2, 3.

If you already have an autism diagnosis for your child or are just beginning your journey, our team of professionals is here to guide you. To get started with ABA therapy at Action Behavior Centers, follow these simple steps:

1

Connect with us

Completing our online interest form takes about 3 minutes and is the first step in connecting with us. After you submit the form, we will call you to discuss your child's needs and explore your options at no cost.

2

Get diagnostic support

If your child doesn't have an autism diagnosis yet, we provide no-cost autism evaluations to help guide your next steps. Our diagnostic support services include online screeners and face-to-face assessments.

3

Begin ABA therapy

If your child gets an autism diagnosis and we verify insurance benefits, they'll be matched with a Board Certified Behavior Analyst® (BCBA®) who will work with your family to set individualized goals for ABA therapy.

The ABC Difference

Diagnostic support services

We offer no-cost autism diagnostic support and online screenings to help your child access the care they need to learn and grow.

Immediate access to care

When you're ready to start ABA therapy, so are we!

1:1 Low clinician-to-child ratio

With a dedicated team of ABA therapists, we provide your child with focused, one-on-one support.

Family involvement at every step

Our twice-a-month Family Guidance sessions give parents valuable insights into their child's progress and practical tools to support learning at home.
